

# Something About Her

Tyrone Wells

She can make it harder to breathe  
The way she takes the air out of the room when she leaves  
And I don't even think that she knows  
All the eyes that follow her wherever she goes

Her beauty is violent  
The way she kills with her eyes, and  
She always stands out from the crowd

There's just something about her, I don't know how  
I could go on without her, there's no way out  
There's just something about her, she stays on your mind  
And forever around her is not enough time  
There's just something about her, something about her, mmh

Whether I'm awake or asleep  
Either way she meets me in my thoughts and my dreams  
And I don't even think that she knows  
I'll never escape her no matter where I go

Her beauty is violent  
The way she kills with her eyes, and  
And I'm too far gone to turn back now

There's just something about her, I don't know how  
I could go on without her, there's no way out  
There's just something about her, she stays on your mind  
And forever around her is not enough time  
There's just something about her, something about her, mmh

She never agrees, oh  
She says what she means, oh  
And I don't mind as long as she's mine

There's just something about her, I don't know how  
I could go on without her, there's no way out  
There's just something about her, she stays on my mind  
And forever around her is not enough time  
There's just something about her, something about her, mmh
