

The Most

Tyrone Wells

I spun the world around
Said "anywhere you want to choose"
Just put your finger down
And I will fly away with you

Now we're on the wind
And the storm begins
You're scared of the dark horizon
But don't be afraid to fall
I'll be here..

When you need me, when you need me,
when you need me the most
when you need me, need me the most
I'm always here for you,
no you are not alone
When you need me, when you need me,
when you need me the most

Midnight I'm fast asleep
2,000 miles away from you
you're crying as you bleed
You wake me up and break the news

how do you start again
when the whole world ends
there's nothing that makes this right
but I'm on my way tonight
I'll be here

When you need me, when you need me,
when you need me the most
when you need me, need me the most
I'm always here for you,
no you are not alone
When you need me, when you need me,
when you need me the most

Any time, every time

When you're on the wind
And the storm begins
Don't be afraid to call
I'll be here

When you need me, when you need me, when you need me the most
I'm always here for you,
No matter how it goes
When you need me, when you need me,
when you need me the most

When you need me, when you need me, when you need me the most
I'm always here for you,
No you are not alone
When you need me, when you need me,
when you need me the most
