

Cold as Ice

Tysondog

Cold hearted you're saint and a sinner
Looking for someone to control
You trample underfoot these that love you
The secrets that you've been told

You've got your eyes wide open
I know you plainly see
You're a car crash happening
And you're happening to me

Like a thief in the night
You came inside
Like a thief in the night
You ate me live

Cold as ice

No time for the lost and the lonely
No time for really no-one at all
You stay in your own little bubble
Trying to keep the riff raff away

Like a thief in the night
You came inside
Like a thief in the night
You ate me live

Cold as ice

You like to keep your old friends around you
So you can judge how far you've come
You laugh at pain felt by others
Your thinking it's unlucky for some

You've got your eyes wide open
And you can plainly see
What it is you're doing what it's doing to me

Like a thief in the night
You came inside
Like a thief in the night
You ate me live

Cold as ice
