

Playing with Fire

Tysondog

Hey last night it was fantastic
There is no light in my hand
Playing around with my fire
Now I know just where I stand
Now it seems to be another man like me
Someone else I can't destroy
Another man as you can see innocent my mind

We catch that fire down deep inside
I know your name
Down deep in so down down down down

Playing around with the fire
There is no life in my hands
Breaking it down for my father
I know it's just where you'll land
With another man take me by the hand
Leads me way up in the sky
Another man about to die looking down on me

We catch that fire down deep inside
I know your name
Down deep in how dare you how dare you lie

The soul the soul
I don't need my soul anymore
There's no sign of fires burning out at sea

I won't do you no favours
I see the light in my hands
Reason is thrown in the corner
I've got your life in my hands

Can you hear me now another broken vow
And the sound is insincere
Everything that I hold dear is attained but all on fire

Oh my oh my down deep inside
I know your name
Down deep from down deep from down deep from within

Making a fuss while you flat-line
Now i know just where to begin
There's another pushing the Roundhouse
Humming round in my head
