

This must be hallucination
A vision of the world on my eyes
This is like perpetual motion
This is life in paradise

A system of a solitude standing
An expedition to the heart
A place of love and understanding
This is life in paradise

Sometimes I believe in magic, baby
Like I believe in you
Sometimes I'm convinced that life's eternal
And truth a stranger

Sometimes I can feel the tension rising
That's when I think of you
Sometimes all my chemistry's in motion
I'm in danger

Feels like we are living in eden
The spirit of utopia
This is a life of one in a million
This is life in paradise

This is a notorious passion
This is not a place to resist
This is more than any possessions
This is life in paradise

Sometimes love is just imagination
Still - it's a shining star
Sometimes I know this won't last forever
Still - I love you

Sometimes we forget about tomorrow
And we get lost in love
Sometimes love can show us pain and sorrow
Still - I love you
