

# Face Down

Ünloco

I sign at the world  
Because you don't seem to care  
And if I grow old  
Then you were never there

And yet it's hard just to find  
The only way back inside  
The only way I could let this go  
And how could I justify  
By taking what's deep inside  
And lie face down  
And lie face down

And if I could  
Then you were so over this  
And then we face its soul

I'm face down but no one knows

And I bleed  
Then I will bleed for you  
And it's hard to see  
To see what I see in you

And so I just realize  
That everything that I fear  
Is back in my face only again  
So put me out on this floor  
Cause that's the way I've been  
Since I lied down  
Since I lied down

And if I could  
Then you were so over this  
And then we face its soul

I'm face down but no one knows

I feel it's the same thing I had  
Since I fell hear, I fear...

I sign at the world  
Because you don't care  
And if I grow old  
Then you will never come back

I'm face down but no one knows

I feel it's the same thing I had  
Since I fell hear, I fear...

I'm face down but no one knows
