

Flood of Lies

UK Subs

I been you yes to you[?]
Said the bug up on the wall
This is 1984
And the reaper's come to call

Said the fool to the wise man
Or was it the other way
But your heart is beating faster
And your pulse begins to race

It's a lie, I don't believe it
It is all been said before
But you better hold on something
This is 1984

While the rivers of hypocrisy are rising to full-flood
If you survive the waters, you're wading in the blood

A flood of lies (2x)

All you political leaders
With your armies gone insane
You lust for guns and violence
While you never [?]

And the churches stand behind you
With wealth and piety
When they empty their collection box
The guns pool at their feet

It's a flood of lies (2x)

The religious and the righteous
Who believe all you say
They think their money saves the children
But it buys guns to blow 'em away

And the very same try to tell us
What happened to the youth
Why they take the money from the needy
Without giving even the truth

Now the rivers of hypocrisy are rising to full-flood
If you survived the waters, you've been wading in the blood
So happy New Year to you, trying to [?] again
If we survive this year, we'll make it to the end

A flood of lies (2x)
Flood of lies
A flood of lies
