

Discolights

Ultrabeat

I want to go out every night
I want to dance under the disco lights
I wanna be with you every night you want me to
I wanna be with you, we can make it right

I want to go out every night
I want to dance under the disco lights
I wanna be with you every night you want me to
I wanna be with you, we can make it right

I want to go out every night (Oh)
I want to dance under the disco lights
I wanna be with you every night you want me to
I wanna be with you, we can make it right

We can make it right
(It right, it right, it right, it right, it right)
We can make it right
(It right, it right, it right, it right, it right)

So get ready tonight
We're here to party 'til the mornin' light
So let me hear you, scream and shout
Just play the music, we can work it out
(It out, it out, it out, it out, it out)
We can work it out
(It out, it out, it out, it out, it out)

I want to go out every night (Oh)
I want to dance under the disco lights
I wanna be with you every night you want me to
I wanna be with you, we can make it right

I want to go out every night (Oh)
I want to dance under the disco lights
I wanna be with you every night you want me to
I wanna be with you, we can make it right

We can make it right
(It right, it right, it right, it right, it right, it right)
We can make it right
(It right, it right, it right, it right, it right, it right)
We can make it right
(We can make it right)
