

# lost and found

UMI

I found you out  
Passed out by the station  
I need you but I'm waiting  
For the right emotions to fill me  
For medication to lift me  
And oh I

I'm lost and I'm found  
I'm held up by the shoe strings  
Heard you're looking for a new thing  
To catch your attention

I would rather be  
Anything you want me to be

Oh~  
And I  
Would drive this car  
Anywhere you want me to see  
Oh~

Close to you is where I wanna be  
In everlasting peace  
Can we go back to sleep  
Forever and ever

And far from you is where I seem to stay  
Return to outer space  
For you to find your place  
In heaven

Ooh~

A big house, little town  
Know that all the pressure steady weighing you down and  
A big heart full of doubt  
Scared that if I'm honest I be letting you down so

See you can let me know  
If you can't let it go  
And all of  
The silence is slowly killing you

So I  
Would rather be  
Anything you want me to be

Oh I  
I will drive this car  
Anywhere you want me to see  
Oh~

Close to you is where I wanna be  
In everlasting peace  
Can we go back to sleep  
Forever and ever

Far from you is where I seem to stay  
Return to outer space  
For you to find your place  
In heaven

Ooh~
