

whatever u like

UMI

Holding my defenses up way sky high
Know you want a girl who ain't probably afraid to cry, no
Don't know why I hide, I'm afraid of the sweet life
Know I got a habit of assuming you the bad guy

I'm sorry, I'm sorry
I didn't mean to crash
Your pity party, your party
Emotions get the best of me
Big-hearted, bit guarded
Still dancing with your energy
Behold your soul so
You know you got the best of me

Baby, you've given me light
You get whatever you like
I wanna hold you tight
No need to put up a fight

And when you're rollin' high
I wanna be by your side
I wanna love you right
Say we can get it tonight

I give you my all
I shouldn't give you a hard time
I thought I put up a wall
But still you leavin' me tongue-tied
Oh

I shouldn't be the reason you stand in the cold air
Didn't have a reason for leavin' you over there
I really love you dearly, it's making me scared
I really need you with me, see my heart on my sleeve I wear

I'm sorry, I'm sorry
I didn't mean to crash
Your pity party, your party
Emotions get the best of me
Big-hearted, bit guarded
Still dancing with your energy
Behold your soul so
You know you got the best of me

Baby, you've given me light
You get whatever you like
I wanna hold you tight
No need to put up a fight

And when you're rollin' high
I wanna be by your side
I wanna love you right
Say we can get it tonight

And when you're rollin' high
I wanna be by your side
I wanna love you right

Say we can get it tonight

And when you're rollin' high
I wanna be by your side
I wanna love you right
Say we can get it tonight

And when you're rollin' high
I wanna be by your side
I wanna love you right
Say we can get it tonight

We can get it tonight, we can get it tonight
