

Nemo

Umphey's McGee

No assumption should be worth listening
They belong with someone else
Set in motion which your still missing
They will always be (with me?)

You are always somewhere above me
Cant there be away around this

And when its there you know you ought to be the one to
ride it through
And its easy to stop before you start
When its there you know you ought to be the one to ride
it through
And its easy to stop before you start

Theres only one more way to think about what everything
could happen if it wasn't left unsaid
And everytime we seem aware of all that matters there
will always be a memory you forget

Be demandin if no ones listening
You will probally find an ear
Set in motion which your still missing
There will always be a need

There has got to be a reason
Whos to say what privelege means

And when its there you know you ought to be the one to
ride it through
And its easy to stop before you start
When its there you know you ought to be the one to ride
it through
And its easy to stop before you start

Before i realize the things ive seen through these eyes
theres only so much more that you could show
As many times as weve been there and back again
now id dont care if ive been no one in the end
As many times as weve been there and back again
now I don't care if I'll be no one in the end
