

Smashin' out they brains
Put 'em in they grave, leave 'em to decay
Welcome you to our deep dark zone
Smashin' out they brains
Put 'em in they grave, leave 'em to decay
Welcome you to our deep dark zone

We born to kill, fuck yeah, the struggle's real
Transform into a wolf sniffin' out some blood until
I can find ways to get out of the devils deal
Cut the seal, burn the page and toss into the deepest hills
Never forget, never regret, you cross that line
Why is it in your nature to be wastin my time
You're a dime, and filled up with aggressions, obsessions
I find my way back to depression
Dark cult with black robes
Dancin' 'round, burnin' down nothing left that can be found
Hear you choke, up in the smoke
Everything you fear comin' near allow me to commandeer

I was counting my losses, but now I'm counting my profits
And all you bitches are prophets, you played this game and you lost it
So sick of the bullshit, you keep on making me nauseous
I'll bring a bag of my vomit because I'm sick and you're toxic
So fuck you, this is what I'm 'bout to fucking do
Gotta face full of nails raising hell to the blood moon
It's so true
I'm hated by many, loved by a few, I set the fuse
Your time is coming close black rose gunna bloom
We welcome all of you to our deep dark zone
The only place upon this earth where I can call my home
All alone inside this darkness where I reside with the crows
And you don't know a thing about me, you just judge on my lows

Smashin' out they brains
Put 'em in they grave, leave 'em to decay
Welcome you to our deep dark zone
Smashin' out they brains
Put 'em in they grave, leave 'em to decay
Welcome you to our deep dark zone
