

Generation No Surrender

Underoath

Light the fuse

Break the locks

Panic

The sky is red

I swear to God they planned it

Watch your back, watch your back

Let's move, we're running out of time

Where do we go

When nowhere's safe

Dig it one foot deep

Call it a coward's grave

Generation No Surrender

They'll have nothing to remember

Generation No Surrender

They'll have nothing to remember

Now we're on our own

And when the lights go out

And it all goes south

What the fuck do we do here

I guess we'll watch it all burn

Watch it all burn

There's nobody coming

It's us vs. them

If you bury me

I'll bury you in this

Coward's grave

Coward's grave

Coward's grave

We'll stay in the dark until we all become

Generation No Surrender

They'll have nothing to remember

Generation No Surrender

They'll have nothing to remember

Kingdom come

They will be done

It's us vs. them

It's us vs. them
