

Fade

Union J

Thinking, so much thinking
Girl, you're dreaming of a dream we both believe in

They'll always be a place for you and I
So you know you don't even have to try
Baby we could sleep but we're not sleeping
Sleep but we're not sleeping

You could never fade
Baby if looks could kill
I would be dead for real
You could never fade
Baby every move you make
Watching every step you take

You could never fade
You could never fade
You could never fade
You could never fade and fade and
You know you never fading fading

[?] you're breathing
So whenever you leave that's when I'm leaving
Nothing's ever gonna change
Our colors never fade away
We're one with two hearts beating
One with two hearts beating

You could never fade
Baby if looks could kill
I would be dead for real
You could never fade
Baby every move you make
Watching every step you take

You could never fade
You could never fade
You could never fade
You could never fade and fade and
You know you never fading fading

You know there ain't a day goes by
Without you playing on my mind
You know you never fading
You know you never fading

You know there ain't day goes by
Without you playing on my mind
You know you never fading
You know you never fading

You know you never fading fading
You know you never fading fading
You know you never fading fading
You know you never fading fading

You know you never fading fading

You know you never fading fading
You know you never fading fading
You know you never fading

You could never fade
You could never fade
You could never fade
You could never fade and fade and
You know you never fading fading
