

Oh Lord have mercy, my good Lord have mercy...
Oh Lord have mercy, my good Lord have mercy...

And me come cool, smooth, good vibes,
Positive music is ruling my life.
Cool, smooth, good vibes,
We United Flavour, we don't want to fight
Cool, smooth, good vibes,
Positive music is ruling our lives
Cool, smooth, good vibes,
We United Flavour, we don't want to fight

We positive people, we don't need to fight...

You come provoking
With the things that you say, the way you walking
And everyone around you thinks you're joking
'Cause we can't believe the way you're talking about us.
If you don't even know me, why do you have to criticize my life?
Just go back with your homies if you still have some
And leave us alone we don't need no harm but good vibes.

And me come cool, smooth, good vibes,
Positive music is ruling my life.
Cool, smooth, good vibes,
We United Flavour, we don't want to fight
Cool, smooth, good vibes,
Positive music is ruling our lives
Cool, smooth, good vibes,
We United Flavour, we don't want to fight

We positive people, we don't need to fight...

And let me tell you, your behavior is so wrong
No respecting those who you don't even know,
So can you tell me what the hell you want?
'Cause me ain't gonna take your stupid things no more.
And all the seeds from the Evil that you brought
You can take them back, here they will never grow
So can you tell me what the hell you want?
'cause me ain't gonna take your stupid things

Y ahora en mi lengua te voy a explicar
Que vivo positivo y no quiero pelear,
Por eso ya no me provoques más
Que ese estilo tuyo conmigo no va.
Y si al final no pretendes cambiar
Sigue tu camino y déjame en paz
Por eso ya no me provoques más
La gente violenta conmigo no va.

No, no, no, no,.....

Y ahora en mi lengua te voy a explicar
Que vivo positivo y no quiero pelear,
Por eso ya no me provoques más
Que ese estilo tuyo conmigo no va.

Y si al final no pretendes cambiar
Sigue tu camino y déjame en paz
Por eso ya no me provoques más
La gente violenta conmigo no va.

No, no, no, no,...
