

Don't Give Up Love

Unitopia

Living away from you, lovin' away from you
Thinkin' of things to do, different things...
Conjure up images, that I don't understand,
All of the plans we had, better left for the future.

Don't...Give...Don't Give Up Love
I still want you
I need you here with me
Don't...give...Don't Give Up, Love
I still need you
But there's something you can't see

I look at your photograph, your photograph looks at me
Think of what might have been, deep within
Surrender to feelings of hopelessness and despair
The only thing that keeps me sane is a light point in
the darkness

Don't...Give...Don't Give Up Love
I still want you
I need you here with me
Don't...Give...Don't Give Up, Love
I still need you
But there's something you can't see

People laughed when I said we were made for one another
But you know I've felt that way from the start
All the plans we made, like all dreams would fade

And all that you could say, was now you're wide awake
You'd changed your point of view, you needed something
new.

Don't...Give...Don't Give Up Love
I still want you
I need you here with me
Don't...Give...Don't Give Up Love
I still need you
But there's something you can't see

Don't...Give...Don't Give Up Love
Set my sights on a new day
Try to forget the past
Don't...Give...Don't Give Up Love
There's so much to remind me
Of a love that wouldn't last
