

## Only You

UNKLE

My body is numb I feel no touch  
Feed the fear and feel no clutch  
Feel the fear of what's to come  
If you don't fear no need to run  
You're neither the master nor the slave  
Willing it faster laws are laid

Only you can say my name  
Only you my saving grace

Til I die I waste away  
Remember my soul forget my face

Only you can say my name  
Only you can say my name

When I'm swallowed by this waves  
When my form begins to fade

Only you can say my name  
Only you can say my name  
Only you  
Only you  
Only you can say my name

It's all gone  
I'm so gone

You're the better me  
Trying to better  
You're the death of me  
You weren't there for me

Only you can say my name

Call it out
