

The Other Side

UNKLE

This patient don't function
But I'll never let you down again
I lay with the embers
Won't you crystallise the complement
These pathways run for us
We condensed the loneliness and woe
My love just ain't funny
I will never let you down again

Come with me to the other side
And be the man I will be the bride
It's the night make your mama cry
Give hope, give love, give up, but are we givin' in

Come with me to the other side
And be the man I will be the bride
It's the night make your mama cry
Give hope, give love, give up, but are we givin' in

Don't look at me that way
I will never let you down again
Don't slip through my fingers
I will crystallise the complement
I'm just a vibration
A little sound blown on the wind
Can't you hear me calling out
I'm a ghost from the other side

The second September
Familiar pattern I know so well
I play with the embers
Now my dominoes are fallin' to hell
What wicked truths are left
To uncover, to discover tonight
Well this joke just ain't funny
But I will never let you down again

Come with me to the other side
And be the man I will be the bride
It's the night make your mama cry
Give hope, give love, give up, but are we givin' in

Come with me to the other side
And be the man I will be the bride
It's the night make your mama cry
Give hope, give love, give up, but are we givin' in

Don't look at me that way
I will never let you down again
All slip through my fingers
I will crystallise the complement
I'm just a vibration
A little sound blown on the wind
Can't you hear me calling out
I'm a ghost from the other side

I'm just a vibration

A little sound blown on the wind
Can't you hear me calling out
I'm a ghost from the other side
