

# Brain, Brain, Go Away

Unlike Pluto

Brain, brain, go away, go away  
Brain, brain, go away, go away  
Come again another day  
Brain, brain, go away, go away

Through the night my mind is racing  
My inner voice and I debating  
On everything I should be changing  
Can't decide so I keep maintaining  
I gotta contain my overactive mind  
I feel detained  
A mental prisoner  
I don't feel awake  
Daydreaming, my mind wanders  
My thoughts, a maze  
That I don't know the way out of

Brain, brain, go away, go away  
Brain, brain, go away, go away  
Come again another day  
Brain, brain, go away, go away

Counting the days down  
Second guessing all day  
Slowing my mind down  
Medicine I can't take  
Everything will go down  
A leader without a crown  
The thoughts can't escape the crowd  
The sound of my inner voice  
Never knows the right choice  
Why can't I mute all of the noise

Brain, brain, go away, go away  
Brain, brain, go away, go away  
Come again another day  
Brain, brain, go away, go away

Raise my white flag  
'Cuz you're right  
I need help, I need help, I need help  
You drive me crazy sometimes  
But you're all, but you're all, I've got

Brain, brain, we're okay  
Brain, brain, we're okay  
Don't you go another day  
Brain, brain, we're okay
