

## Found You

Unlike Pluto

Why am I lonely?  
Why am I lonely when you're here?  
Right there beside me  
Touching and holding but I don't feel anything that's real inside myself  
Baby, death is at the door  
Push and shove, come on, give me something  
What are we here for?

Who can save us?  
Who can save us?  
Who, jumpstart this heart of ours before it's torn apart  
Who can save us?

Finally found you  
Finally found what I thought I wanted  
Was it about you?  
Or was I hiding from a fear of never knowing love would come to me  
Baby, just a lonely soul  
Running out of rose-colored glasses  
Should I just let go?

Who can save us?  
Who can save us?  
Who, jumpstart this heart of ours before it's torn apart  
Who can save us?

Who can save us?  
Who can save us?  
Who, jumpstart this heart of ours before it's torn apart  
Who can save us?
