

# Interstellar Weather

Unlike Pluto

Minimize what you never found  
My mind is always slipping  
Hypnotize me, bring me back now  
Cuz my nerves have got me slippin'

Hope I'm never losing moments in the end  
Ruminating, oscillating, play pretend

Open up your eyes, up to the sun  
Cuz nothing last forever, nothing lasts forever  
Watch the brightest star as it revolves  
The lights don't last forever, (in) interstellar weather

My head might as well been in the ground  
With the truth that needed diggin'  
Lost the sight of the here and now  
And I'm running out of oxygen

In a corner, looking for a bitter end  
Speculating, hesitating, condescend

Light is cutting through the haze  
Darkest night becomes the day  
Solar never went away  
It was just behind the rain

Open up your eyes, up to the sun  
Cuz nothing last forever, nothing lasts forever  
Watch the brightest star as it revolves  
The lights don't last forever, (in) interstellar weather

Catalyze what you need in life  
Fossilize let it come to life  
Let it come to life (yeah)  
Recognize your conscious mind  
Ionize and magnetize  
Moments that slip by

Open up your eyes, up to the sun  
Cuz nothing last forever, nothing lasts forever  
Watch the brightest star as it revolves  
The lights don't last forever, (in) interstellar weather
