

Synthetic Tragedy

Unlike Pluto

I won't love forever
So kiss me while the stars are bright
You'll find someone better
So kiss me while we're still alive

Picture perfect we had everything
Shock me like it's stormy weather
Build an island on a fantasy
I just wanna be with you forever

Feels like
The very first time
The very first time
Feels like
The first time that I met you

It's not yesterday anymore
There's so much that we don't know
Nothing is forever I am told
So don't forget before we go

I won't love forever
So kiss me while the stars are bright
You'll find someone better
So kiss me while we're still alive

So break me down you broke everything
Sink your teeth in gloomy weather
I'm the prey and you know how to feed
Don't drip the blood inside your sweater

Feels like
The very first time
The very first time
Feels like
The first time that I met you

It's not yesterday anymore
There's so much that we don't know
Nothing is forever I am told
So don't forget before we go

I won't love forever
So kiss me while the stars are bright
You'll find someone better
So kiss me while we're still alive

I'm at peace with the changes
You don't recognize your phases
Shades of gray is where your pain is Color-coded
Color-coded

I remind myself that

It's not yesterday anymore
There's so much that we don't know
Nothing is forever I am told

So don't forget before we go

I won't love forever

So kiss me while the stars are bright

You'll find someone better

So kiss me while we're still alive
