

Moving on (All the Good Things)

Up Dharma Down

Walking out and in the clear
Taking in the orange sunrise
Heading that way south of east
Living all my dreams tonight (oh oh)
Riding out into the sunset
Treading this road head up high
Looking way too far ahead and it's all right

Diving down one whole city deep
Run into your arms wide open
Pulse is racing, I can't sleep
A way of life by chasing moments

New to all the good things, bad things
I am new to all good things, bad things
Loving new and all the new things, old things
Loving new and all the good things, good things

No one ever got the right thing, wrong
Taking all the view from where I stand
You are everything I want to learn and more
This is one of them good things I want to last (oh oh)
Moving ahead is easy
Take my hand, spread your wings free
Wait no more, just don't ask me why
It's about that time it hurt no one to try
Finally lost my fears of heights

New to all the good things, good things
I am new to all good things, good things
Loving new and all the new things, new things
Loving new and all the good things, good things

Are we good with all the new things, new things?
I am new to all good things, good things
Loving new and all the new things, new things
Loving new and all the good things, good things
