

# The Anthem of the Doomed

## Upon a Burning Body

The water has risen  
The ocean has swallowed the land  
Food grown from the suicide seed  
To feed to the mass  
The sun has turned black  
It's close to the end of days  
Poison in the form of a pill  
To help tame the crave

Toxic waste consuming the earth  
Pollution by the tone we have yet to unearth

The existence of the planet doomed  
The land we inhabit doomed  
The world as we know it doomed  
This is the anthem of the doomed

Greed has poisoned our minds  
Corruption grabs hold of our souls  
So obvious it's clear to the blind  
Elite have overwhelming control

The existence of the planet doomed  
The land we inhabit doomed  
The world as we know it doomed  
This is the anthem of the doomed

Go

Toxic waste consuming the earth  
Pollution by the tone we have yet to unearth  
Yet to unearth

This is the anthem of the doomed  
And you love the poison
