

Snowglobe

UPSAHL

Love the season, walking through the snow
Everybody's turning off our phones
Open hearts, shut the world out
Staying up, slow the time down

Pouring drinks doing up the tree
Everybody lighting up the street
Bring a friend, down to my house
Share the love, what it's all about

Life gets so crazy sometimes
We start to lose sight
Of what really matters just

It's just you and me
Locked in like family
Nothing else matters when we go home
Dancing in our own snow globe
It's you and me
Nowhere I'd rather be
Than staying in while the fire glows
Dancing in our own snow globe

Than staying in while the fire glows
Dancing in our own snow globe

All our problems, watch em fade away
Press pause for the holiday
Turn it up, spinning records
Cozied up in our sweaters

Haven't seen you in a long time
But being with you always feels right
Holding on to the moments
Until we go yea I know it's just you and me

Locked in like family
Nothing else matters when we go home
Dancing in our own snow globe
It's you and me
Nowhere I'd rather be
Than staying in while the fire glows
Dancing in our own snow globe

Staying in while the fire glows
Dancing in our own snow globe
Staying in while the fire glows
Dancing in our own snow globe

Life gets so crazy sometimes
We start to lose sight
Of what really matters just

You and me
Locked in like family
Nothing else matters when we go home
Dancing in our own snow globe

It's you and me
Nowhere I'd rather be
Than staying in while the fire glows
Dancing in our own snow globe

Staying in while the fire glows
Dancing in our own snow globe
Staying in while the fire glows
Dancing in our own snow globe
