

# Sunflower

UPSAHL

I've been trying  
Been giving it all for you  
And you've been loving  
Despite of what we've been through  
And we both know of the unknown  
But we're willing to walk that path  
And we are unaware of the destination

And sometimes the existential idea of it all  
Is what forces us to fall

Be my guide by my side  
You will keep us standing tall  
Not anyone but you was able to break this fall  
And I know that when I look back  
You're my sunflower  
You're my sunflower

And we both have heard of the words left unsaid  
But we write the names in the streets of our city  
While we walk the path of sweet redemption

And sometimes the existential idea of it all  
Is what forces us to fall

Be my guide by my side  
You will keep us standing tall  
Not anyone but you was able to break this fall  
And I know that when I look back  
You're my sunflower  
You're my sunflower
