

## Cold Hearted

URBANDUB

How could you be so cold hearted  
You only look out yourself  
You run the risk of us parting  
Maybe you took more than expected  
Lie and wait for us to break apart  
We'll be flipping them off  
Cuz I'm tired of being the one alone  
And wait for all the things to get better  
So I'll cut clean, just cut clean  
Just cut clean  
The situation is beyond repair  
No remorse and no emotion  
Can you find a heart, can you fight  
If only you could realize I only wish you well  
Call it what you will  
Let's have a conversation  
So we can figure things out  
Unearth the things we've done wrong things out  
Until the moment we break and guilt fades away  
Can you find a heart  
How could you be so, you're being so cold  
How could you be so cold hearted  
You only look out for yourself  
Say goodbye to all your friends
