

# Already Mine

Us The Duo

Where did it go?  
The love I once knew  
Is lost in the dark  
The light can't shine through

Where did we go?  
I can't see it now  
I'm fighting the night  
To find you somehow

And I miss you  
Even though you're so close  
I miss you  
Even though you're right next to me

I already have you  
But I wanna know you again  
It's so hard to kiss you  
When it feels like I'm only a friend

I can't control you  
Or what your heart will decide  
But I'll never stop trying to fall back in love with what's already mine

Where did it go?  
The passionate fire  
We can't find the flame  
And now we're both tired

What do we do?  
When all we have left is dying for life on it's last breath

And I miss you  
Even though you're so close  
I miss you  
Even though you're right next to me

I already have you  
But I wanna know you again  
It's so hard to kiss you  
When it feels like I'm only a friend

I can't control you  
Or what your heart will decide  
But I'll never stop trying to fall back in love with what's already mine

If we fight through this battle and win  
We'll be stronger than who we were then

I already have you  
But I wanna know you again  
It's so hard to kiss you  
When it feels like I'm only a friend

I can't control you  
Or what your heart will decide  
But I'll never stop trying to fall back in love with what's already mine

I miss you  
I miss you  
I miss you
