

Rather Be with You

Us The Duo

I'm exhausted from trying my hardest
You've taken all of the art from the artist
And I'm physically strained
Trying to maintain
The beautiful city that you are
And I'm tired of fame
Confusing my brain
Thinking I'm someone that I'm not

Where did all the hours go?
Wish I knew it all before I started

I can't do anything
I can't do anything without you
Without you
I have tried everything
I have tried everything without you
I got no where (no where) to go
I rather be with you than be alone

We always want to be people who're honest
All that fame does is favor the smartest
And I'm mentally dead
From losing my head
Fed up with all of these mind games

Oh did you forget
All the things that you said
Do you remember my name

Where did all the hours go?
Wish I knew it all before I started

I can't do anything
I can't do anything without you
Without you
I have tried everything
I have tried everything without you
I got no where (no where) to go
I rather be with you than be alone

Why do I also knew you
Why am I so uptight
Whenever I walk away
But always coming back

I can't do anything
I can't do anything without you (without you)
Without you
I have tried everything (everything)
I have tried everything without you
I got no where (no where) to go
I rather be with you than be alone
