

# Manic Depression

Useless ID

I've got a mad! mad! mad! manic depression  
Calling my sense in the dead of night  
Wasting my time on another condition  
Never change the way that I felt inside

Everybody's got a fuse  
Mine was made to be broken  
Every time I cut it loose  
My eyes just leave me awoken

I've got a bad bad case of a passive aggression  
Don't get near cuz the feeling burns  
There's no need to cause a commotion  
Sick of the way that we're taking turns

for getting on each others' nerves  
Something's wrong with the picture  
All I want in return  
is if you can't handle the pressure  
then just let go!

Bang my head through the wall  
I am delusional  
I just can't stand to see us like this  
This is my only world  
I've waltzed you through it all  
You left me in the darkness since

Now we're spending more time in each others' minds  
There's no cure, there's only addiction  
Always on the hunt but we never find

Later it occurs to me  
that something sooner will happen  
We settled for something less  
In the meantime, I'll sleep with one eye open

Bang my head through the wall  
I am delusional  
I just can't stand to see us like this  
This is my only world  
I've waltzed you through it all  
You left me in the darkness since

Always at a distance  
You just walk away and never listen  
Always complications  
So why do we keep filling the void, let's just move on

Bang my head through the wall  
I am delusional  
I just can't stand to see us like this  
This is my only world  
I've waltzed you through it all  
You left me in the darkness since
