

Fall Before I Fold

Valencia

If it were me, I wouldn't fall before I fold
I'm not too weak to say I'm stuck on a dead end road
And if you believe what you believe
Just do it all with sincerity
And don't let anybody fuck with what brings you home

It took a hard hand of fate
To learn from my mistakes
The more I tried to change
The more I stayed the same

There's something wrong
(There's something wrong)
I can't make sense in my own head
Or pull myself up out of it when I need to
I've tried for so long
(Tried for so long)
I just can't understand where everyone went
I'm lost in it all

It's like I've been (broken) broken ever since
2006 I just can't get it right
I don't know if it's just fate
Or why things went this way
All I can say is that I'm trying to get it right

So give me that hard hand of fate
And to learn from my mistakes
It seems the more I try to change
The more I stay the same

There's something wrong
(There's something wrong)
I can't make sense in my own head
Or pull myself up out of it when I need to
I've tried for so long
(Tried for so long)
I just can't understand where everyone went
I'm lost in it all

I'm waiting (waiting)
To see it (to see it)
I can't get away from it all (away from it all)
I'm dying (dying)
I need this

But I can't begin
To live through the fall
I'm dying
I'm needing

There's something wrong
(There's something wrong)
I can't make sense in my own head
Or pull myself up out of it when I need to
I've tried for so long
(Tried for so long)

I still can't understand where everyone went
I'm lost in it all
(Tried, tried)
I'm lost in it all
(Tried, tried)
Where everyone went
I'm lost in it all
