W.A.L

Valley

Start with the bottle, hands on it
You go walk, but you never go forward
Can't sleep, but you can't stay awake with dreams

You're honest when you're trying, I'm finding
Inside of every limb there is a lion
You can't talk, but you can't hold back the scream

So leave that ugly place that you call home now
Your home is your own space now
You're not alone now

We are love

Done with all the back end, Star Trek
Walk forward looking at the back end
Play a night show, lights and you play my song
The city is a struggle that will double
Can't sleep, dreams will get you into trouble
Jump around away with a classic song

[?] your soul heart with a lock and key
You're just a kid, a rebel
You still in love, can't you see

We are still love
We are still love
We are love

It's not all the same all the time I know
Seasons change, so do people
Strange to see them go
It's not all the same all the time I know
Seasons change, so do people
Strange to see them go

We are still loved I know
We are still loved
We are love
We are still loved

It's not all the same all the time I know
It's not all the same all the time I know

We are love
