

Latest Record Project

Van Morrison

Have you got my latest record project?
You got my latest record project

Not something that I used to do
Not something that you used to
Not something might be able to relate to
In the present, present

If you got my latest songs I'm singing
You got my latest songs I'm singing

Not something from so long ago
Not something that you might wanna know
But something I can relate to
In the present, in the present

Have you got my latest record project?
You got my latest record project

Not something way back in the day
Not something I have to say
Not something when I gave it away
Long ago, long ago

Have you got my latest record project?
Got my latest record project, alright

Have you got my latest record project?
Got my latest record project

Yeah, we're gonna get it right away
It's not something so far away
Gotta catch up what I say
And the present, and the present

Have you got my latest songs I'm singing
Got my latest joy I'm bringing

To the present (to the present), to the present (to the present)
To the present (to the present), to the present (to the present)
To the present (to the present), to the present (to the present)
Moment, moment

Have you got my latest record project?
Got my latest record project

It's not something from long ago
It's not something that you might know
It's something that I wanna grow
In the moment, in the moment

Have you got my latest record project?
Got my latest record project

In the moment (in the moment), in the present (in the present)
In the moment (in the moment), in the present (in the present)
In the moment (in the moment), in the present (in the present)

Fly away

You got my latest record project
Got my latest record project
Got my latest record project
Got my latest record project
