

## Where We Start

Vance Joy

Storm rolled in to our surprise  
It doesn't rain under the tall trees  
You were my love, you were my tree  
You would always protect me  
It's easier to take a heart than let your own be taken  
I love that little smile you keep in the corner of your mouth  
And is it hard to see me go?  
Doing things the wrong way  
If you're here, when I fall  
I know I won't fall a long way  
A long way

We were talking on the phone  
I stepped out into the hallway  
My face was frozen on the screen  
And you started laughing  
Put a cone through your hair  
And a clean shirt on  
There's people come 'round here soon  
Everyone, act normal  
Big trees fall all the time  
They crack and sound like lightning  
Leave a big space in your sky when they fall  
When they fall a long way  
A long way

Pick me up  
Fill my cup now  
Take me down, down to where we start  
Let's go too far now  
All tangled up  
Take me down, down to where we start  
Down to where we start  
Where we start
