

Let It Rain

Vandenberg

Bring on the night
I wanna stay awake 'till the morning light
A last kiss goodbye
One last night laying by your side

We tried so hard
To keep this love alive
But from the start
It just tore us apart

let it rain
Down on me Down on me
Let it wash away the heartache
For you and me and set us free
Let it rain

There's no lack of love
But now we find that it's not enough
But a heart can't lie baby
We were just heading for a sad goodbye

As time went by
We tried to keep this love alive
But we just watched it die

Let it rain...

Now we're standing face to face
Hoping time will ease the pain
Once we've gone our separate ways
