

# Light It Up

Vandenberg

Light it up

Thunder cracks way up in the sky  
The wild dog's back, he's heading for the night  
Midas touch, turns pyre into gold  
Let no one know his blood is running cold

Fighting like an animal  
He cries in the dark  
Comes out of the dust

He's gotta light it up  
Set fire to the rain  
Then burn it again  
He's gonna light it up  
He knows there's only one way to go...  
The whole way down

Back on trial, you keep up the disguise  
Against all odds, you make it through the night  
The curtain calls, you're blinded by the light  
It haunts us all until the day we die

Running like an animal  
And you howl like the wolf  
You don't know how to stop

You gotta light it up  
Set fire to the rain  
Then burn it again  
You gotta light it up  
There's only one way to go...  
The whole way down

Set fire to the rain  
Do it again

He just can't seem to get enough  
Cause time won't heal, it just kills the pain

He's gotta light it up  
Set fire to the rain  
Then burn it again  
You gotta light it up  
Don't ever stop, don't let it go

Light it up  
Let everyone know  
Anything goes  
Light it up  
You know there's only one way to go...  
The whole way down

The whole way down

Light it up  
Light it up

Light it up  
Light it up
