

Light Up The Sky

Vandenberg

You gotta let it out
Your blood boiling through your veins
You wanna break free 'n cut the reigns
You've got the power to break the chains

No way you're gonna fade away
Show'm that you're here to stay
Gotta sing your song right here right now

Light up the sky
Ain't gonna let this night slip away
Light up the sky
Ain't gonna stop 'till the break of day
Set the night on fire
Burn it up, burn it!

You've been feeling rough
Barely made it through the day
Seen it, done it, you had enough
And you're ready to break away

No way you're gonna fade away...

Light up the sky...

You've been holding back
But you're ready to cut loose
Had a hard time keeping your energy inside
And you really wanna light the fuse

No way you're gonna fade away...
