

# Thunder And Lightning

Vandenberg

She's like a loaded gun  
Just needs another hit and run  
She'll hit you like a ton of bricks  
But you hang on tight, keep holding on

You're going nowhere fast  
Cause soon tomorrow's dead and gone  
You know the more you try to treat her right  
The more you end up doing wrong

She's thunder and lightning  
You got all to gain, nothing left to lose  
In a sweat cause breaking up is hard to do  
Just like thunder and lightning  
Watch out - she will light your fuse

Have you had enough?  
Had enough of what she's got... now have you?  
And she's never home to take your calls  
You know it cuts you like a knife

She's thunder and lightning  
You got all to gain, nothing left to lose  
But you sweat cause breaking up is hard to do  
Just like thunder and lightning  
Watch out - she's got her eye on you

You got nowhere to run  
You're trying to hide in the dead of the night  
So you fight to break free but the call of the wild  
It's inside your mind

You know opposites attract  
She cracks the whip, you crash and burn  
So tell me, can you stand the heat?  
When the going gets tough

She's thunder and lightning  
You got all to gain, nothing left to lose  
And you sweat cause breaking up is hard to do

Still you can't stop the fighting  
She's gotta have it all  
Cause she's thunder and lightning  
She will light your fuse  
Can you light her fuse?

Hear me now  
She's not good for you
