

Close The Distance

Vanic

Never sure exactly what you need
When you hide the
When you hide the love away from me

See you coming
See you coming up in different ways
Need you right here
Need you right here till I'm not afraid

I just wanna close the distance
I need you so bad
I need you near
I just wanna close the distance
I need you so bad
Don't let me down

I just wanna close the distance
I need you so bad
I just wanna close the distance
I need you so bad
I just wanna close the distance
I need you so bad
I just wanna close the distance

Feels like I've been here too many times
Trying to get the
Trying to get the feeling to subside

See you coming
See you coming up in different ways
Need you right here
Need you right here till I'm not afraid

I just wanna close the distance
I need you bad
I just wanna close the distance
I need you near
I just wanna close the distance
I need you so bad
I just wanna close the distance

Don't let me down
Don't let me down

I just wanna close the distance
I need you bad
I just wanna close the distance
Don't let me down

I just wanna close the distance
I need you bad
I just wanna close the distance
I need you so bad
