

# What Did I Do

Vanic

What did I, what did I  
What did I  
What did I do to you  
You said you love me  
But you're acting like you hate me  
Screaming till your face turns blue

What did I, what did I  
What did I  
What did I do to you  
I feel like everything I do is never going to be enough for you

Why am I a slave to the way you make me feel  
Playing games with my head was it ever real  
There's no gold in the ring around my heart  
No truth in the vows death do we part

You call the shots  
I take the blame  
And I pour the drinks cause I take all the pain  
I was a puppet scarred by your name

What did I  
What did I  
I feel like everything I do is never going to be enough for you

If sweet is what you thought I was you're wrong  
So take me off your list I don't belong  
I'd rather be the villain than the victim  
Cause life's too short to be living in your hell

Yeah you were drinking all day long  
Too busy holding a beer  
But never holding a job  
And you smoked so much  
You burned a hole through the couch  
Too bad that cigarette  
Didn't burn you down with the house

You cause a fire  
Wherever you go  
And burned down  
Everything that I called home  
Last year was the first time  
And this is the last time  
That you're  
Eating me alive

You call the shots  
I take the blame  
And I pour the drinks  
Cause I take all the pain  
I'm not a puppet anymore

What did I  
What did I  
I feel like everything I do is never going to be enough for you

What did I, what did I  
What did I  
What did I do to you  
You said you love me  
But you're acting like you hate me  
Screaming till your face turns blue

What did I, what did I  
What did I  
What did I do to you  
I feel like everything I do is never going to be enough for you

What did I, what did I  
What did I  
What did I do to you  
You said you love me  
But you're acting like you hate me  
Screaming till your face turns blue

What did I, what did I  
What did I  
What did I do to you  
I feel like everything I do is never going to be enough for you
