

# Daylight

Vanilla Ninja

When darkness falls, the heaven waits  
The stars align and light our way  
And you say: Why do we wait?

Let's leave today it's flaws behind  
Find the world in each others' eyes  
We're in flames  
Why do we wait?

My favourite song on the radio  
Your hand in mine I won't let go  
And I just know you just know it's faith

I said, hey love  
I can stay until daylight  
I just know that it feels right  
Dance the night away

I said, hey love  
You can hold me till daylight  
Wish it stayed this way  
All the nights and days  
Inside the perfect haze  
Dance the night away

When darkness fades to lay the shades  
Leave its mark on the hearts that break  
And I'll wait  
No more escape

And when it's time to say goodbye  
You turn to me looking to my eyes  
And you say  
Don't ever change

My favourite song on the radio  
Your hand in mine I won't let go  
And I just know you just know it's faith

I said, hey love  
I can stay until daylight  
I just know that it feels right  
Dance the night away

I said, hey love  
You can hold me till daylight  
Wish it stayed this way  
All the nights and days

I just know that it feels right
