

Cool Off The Rain

VanJess

Tell me what to do when there's something
Always close the book, that means nothing
You treat me wrong so we sleep on surface deep
And people don't know we keep shit underneath
Even when there's company over, babe
And even when we're in public, yeah
They so clueless to it
The misery, it ain't ending
I don't think that I can handle this
Pretendin' all the air is clear in here
We just movin' too quick
Gettin' too dizzy to see

Tell me what to do this time?
A storm hit and it's drained all my energy, my energy
Tell me how to do this right?
'Cause you been actin' strange like we enemies
I'll cool off the rain
(I'll cool off the rain)
(I'll cool off the rain)

When I think of what to wear, I'm coming
Eat me from the back and I'm fronting
You my favourite, on my blood being
Saturate the space, no more arguing
Let me monsoon up your beard
Don't let the windchill fuck up your head
I'm the one for you
We catching flights in a whole typhoon
There's but so much I can take
So baby cool down and ride the wave
You're the one for me
And let it go, reach out to me

Tell me what to do this time?
A storm hit and it's drained all my energy, my energy
Tell me how to do this right?
'Cause you been actin' strange like we enemies
I'll cool off the rain
(I'll cool off the rain)
(I'll cool off the rain)
