

# Feelz Right

VanJess

If it feels right it probably does  
Deep in the night you flame or flicker  
I know its hard to trust the click  
You moving lonely so tired of phoneys  
You play nice they will oblige  
You keep tight  
Only beside the one who right  
The only opp or the only soldier  
Run with the stallions don't be surprise  
If you did right you wouldn't need to live a lie  
Not from the side you still deny  
You on a roll I'm not surprised  
You look nervous living your purpose cause you deserve it  
Everything you gone get baby

Yea boy want to see your dreams come true  
But you got to let me through yeah  
Because you know I'm here for you  
Ayeeee  
And what we know what to bring  
And time can the only compensate  
And the only thing that's left is intuition

Do it cause it feels right  
Love me cause it feels right  
Do it when it feels right  
Yeah babe

Maybe our division is embarking on us  
Even when I said the ride is falling  
See the best for you  
Don't fight no more  
They won't see us private now  
I'm the safe haven when your alone  
Don't rush it no  
There is no rush in the wild  
Walking through the streets  
Thinking there is a God  
Praying for better days  
There is no trust in the wild  
These days don't make sense  
But I'm still here for you

In a world with no more air to breathe  
And on top the only currency  
And the only thing that's left is intuition

Do it cause it feels right  
(Only cause it feels right)  
Love me cause it feels right  
(Onlycause it feels right)  
Do it when it feels right  
(Only cause it feels right)  
Yeah babe yeah

Where you going  
I can see your house down the river flowing

When you going to stop rocking the boat  
Cause that's no way to love  
Where you looking  
We were on course but I feel us turning  
When you going to stop rocking the boat  
Cause that's no way to love
