FLY-BY ALIEN

VANT

That boy's got his sneakers on
Got a new guitar
Start a cool, cool punk band

That girl's got a rolling drum
Got a snappy tongue
Got a cold, cold right hand

That world's got a few problems
Got a dying sun
It's a tick tock time bomb

That race is gonna kill itself
There'll be nothing left
We can take, take the shell

I'm just passing by section 85
My observation, let's just take their sun

That moon is an ugly blister
That gravitates around it's obese sister

That species is a waste of space
I hate this place
Can I zap my laser?

I'm just passing by section 85
My observation, let's just take their sun

Tick tock tick tock tick tock tick tock
Sun

You are asleep but won't dream
You are a cog in a machine
You are a fire with no spark
You are the light in the dark
You are an animal, follow your instinct
You are important, you are extinct
You have a meaning, you have a purpose
This life is short, make sure it's worth it

My observation, let's just take their sun
