

# Silly Jane

VANT

Went out to a protest on the strand  
A young girl held a sign above her head  
That read  
You will die of old age  
And we will die of climate change  
Her parents stayed at home and washed their hands  
They said

Oh that silly Jane  
She's trying to change the world again  
Oh that silly Jane  
She's trying to change our minds again

When all is said and done  
More is said than done

Freedom ain't a choice with which you're born  
To love and to be loved is to be scorned  
I wanna see the world some day  
Before it all starts to decay  
Does that just make me part of the problem?

I don't need a battleship to get my point across

When all is said and done  
More is said than done  
When all is said and done  
(We're at the point of devolution)  
More is said than done

But then she showed me love  
But then she showed me hate  
But then she showed me hope  
Yeah things turned out just great

I don't need a battleship to get my point across

Oh that silly Jane  
She's trying to change the world again  
Oh that silly Jane  
She's trying to change our minds again

When all is said and done  
(We're at the point of devolution)  
More is said than done  
(Midst a personal demolition)  
When all is said and done  
(We're at the point of devolution)  
More is said than done

But then she showed me love  
But then she showed me hate  
But then she showed me hope  
Yeah things turned out just great
