

# Shine Shine

Vargas & Lagola

I just wanna feel  
Your arms around me like you need me for a lifetime  
I just wanna see  
All your stars shine, shine bright over the black skies

Show me something real  
I can see the truth in your eyes  
Tell me 'bout your dreams  
I'll do my best to make 'em come alive

Every cloud has a silver lining  
There is more to see where all the flowers grow  
Let it shine a light over your face don't wait until it's gone  
Cause we got stories to believe and call our own
