Scars For You To Remember

Varials

Bleed me out to dry

Break me (Take me apart)
Erase me (Back to the start)
Why don't you break me?
I've been around for too long
So take me back to the start

I see blood (I see blood)
Scars for you to remember
Blood at the tips of my fingers
What the fuck did you think?
That you'd get away from me? (You'd get away)
That you could live your life?
Live your life without me?

Without [?] in your every moment
Without [?] of you [?] me
Tracing every step, cutting every breath short
This is my pain, and I am yours

Make no mistake
I am here to stay
Make no mistake
You'll take this to your grave

I see blood (I see blood)
Scars for you to remember
Blood at the tips of my fingers
What the fuck did you think?
That you'd get away from me? (You'd get away)
That you could live your life?
Live your life without me?

There's no escape (No escape)
There's no escape

We're all one in the same
You've had your way with my fucking head
Is it our time?
Our time to die?
