

when i'm with you

vaultboy

Mm-mm, mm

The promises we promise when we aren't so afraid
Like all the missing pieces are all falling into place
The way you make me feel like I am floating up in space
Look, I know you want the things I want, but it's okay
That you've got your doubts
That's only natural the way you've been let down
But can I erase 'em all?

'Cause when I'm with you
All of my precautions float away
Baby, there's no problems that could change
The way you got me feeling every day
I know that you're afraid but baby stay
And it'll be worth it
When I'm with you, when I'm with you
Yeah

And honestly you're a gift to me when things are going wrong
The way you went to heaven and the way you face the earth
Your delicate expressions when you're checking on my health
I swear that every second is a blessing, I can tell
That you've got your doubts
That's only natural the way you've been let down
But can I erase 'em all?

'Cause when I'm with you
All of my precautions float away (All my precautions float away
)
Baby, there's no problems that could change (That could change)
The way you got me feeling every day
(The way you got me feeling every day)
I know that you're afraid but baby stay
And it'll be worth it
When I'm with you, when I'm with you, oh, oh
When I'm with you, oh, oh

Oh, baby stay
It'll be worth it
When I'm with you
