VEDO

(It's Vedo, baby)

Let me be your melatonin
Slippin' right into wet dreams
Deep enough, I'm on your ocean
You should add me to your routine, girl
Let me take you where it's open
Create some waves in that ocean
Ooo
Front and center so they notice
You're what I wanted, so I spoke it
Oooo

Girl, it's only you
Baby, no plus one—just me and you
This experience was made for two
Baby, just sit back, enjoy the view
Girl, it's all about you
I'm tryna set you free

Your body's invited
I wanna turn you on
The party is just getting started
And we're rockin' until we see the sun

You're invited

Girl, we should find a rhythm like a heartbeat
Make every move like poetry in motion
Body talkin' a language that we can't speak
Show you some of your different emotions

Get you high like rain clouds
Let all your love just rain down
Me and you alone—just imagine it
Body moving closer like magnets
Taking you to spaces you haven't been, girl
