We will stand, make this place our own One day we will leave it behind We will stand, make this place our own And one day leave it all behind [2x]

There is a place
An isle of non-existence created by our drive to live
Somewhere other than reality
We must sacrifice to survive, others try to take and deprive

Live together, die alone [2x]

Created by our drive to live

Fight on until it's known, our purpose, our being here

Must be a sign to the path, to the path we must take

From the sky a black smoke engulfs our minds, our souls, our minds (our minds) (our souls)

We fight on until it is known, our purpose

This is the path

The path we must take

We will stand make this place our own

One day we will leave it behind

We will stand, make this place our own

And one day leave it all behind
